About the Authors

Haroun Khan is one of Europe's leading OBIEE consultants. Being a Computer Science graduate from Imperial College, London, he has been involved with OBIEE from its early days as an acquisition from nQuire by Siebel, and subsequently as part of the Oracle family. Haroun has worked as a consultant on projects worldwide for Siebel and as a Principal Consultant for Oracle over a period of 10 years. He has specialized in BI and data warehousing over a longer period including time working at MicroStrategy. Haroun now freelances in leading and designing projects in the BI and data warehousing space, combining this with entrepreneurial activities, such as his own e-commerce business JRPass.com. In his downtime, Haroun likes to spend as much time as possible climbing in the mountains, away from a computer screen and avoiding numerous requests to write a blog or get on another plane!

Haroun works through his own company Awaan and can be contacted at his company address haroun@awaan.eu.

It goes without saying, but I would like to thank my parents, Zainab and Ayub for their support, encouragement and for everything, really. Also I have to include my sisters Sophia and Soraya so that they can have their name in print and I can avoid admonishments! Last, but not least, thanks to my toddler niece Sharifa for providing me with boundless distractions and opportunities to procrastinate.

Thanks goes to all those people (too many to mention) who I've worked with on great projects during my time at Oracle and MicroStrategy. Thanks also go out to Packt and their editors for their work. Finally, I would also like to extend my appreciation to my co-authors for their commitment and energy. It's been tiring but fun!

Christian Screen is a Business Intelligence evangelist with over 15 years of experience in technology ranging from low-level programming, E-Commerce, Data Warehousing, Enterprise Performance Management and, of course, Business Intelligence. In his spare time, he enjoys writing technical articles, learning new technologies, developing products, writing software, spending time with his family, trying to change the world, and running his blog and podcast at ArtOfBi.com. He is an Oracle ACE, an Oracle Deputy CTO, and holds several technology and project management certifications.

I would like to thank my family (wife Kirsten and three super children – Riley, Jaxon, and Dylan) seems so cliché but indeed their patience and support has been essential to the process of writing my first book. I'd also like to thank all of my colleagues who have provided continual intellectual ferment for our work with Business Intelligence and Enterprise Performance Management solutions. Thanks to Greg, Jason, and Tom at Analytic Vision for giving me a chance with my first consulting gig. Thanks to Amy Mayer of BI Consulting Group and Capgemini for my second consulting gig and having an unbelievable culture that I'll take with me wherever I may go. There are a few people at Oracle to thank as well, such as Mike Hallett in the UK who handles the BI/EPM partner community for EMEA and does an amazing job at building the community and keeping even us in the USA informed, the Oracle ACE Program leaders Justin Kestelyn and Lillian Buziak (Brian Stover, of course, many thanks!) for the Oracle ACE moniker, and the Oracle BI development team Matt Bedin and Phillippe Lions for their SampleApp and other assistance. I'd like to generally thank other authors of technical books that I may have referred to over the years and the many bloggers that find it their duty to share the tidbits, prose, or other knowledge that make finding an answer to daily issues merely a Google search away – thanks for sharing. A big thanks goes to the very keen reviewers of this book – Kevin McGinley, Daan Bakboord, and Ramke Ramakrishnan. We truly appreciate the time, effort, and suggestions you've provided to make this book better. Lastly, thanks to you for reading our first book – hopefully you purchased it legally – I trust you will find it useful.

Adrian Ward started working in Siebel Analytics back in 2001 and quickly realized the potential in the technology. He formed the UK's first independent consultancy focusing purely on OBIEE (née Siebel Analytics) and Oracle BI Applications. He has led many large successful OBIEE implementations in a wide range of business sectors, from Investment Banking to Military operations. His deep technical OBIEE and BI Applications knowledge has been applied on dozens of projects throughout the globe including HR, Sales, Service, Pharma, and Custom Analytics.

He was also one of the first bloggers on Oracle BIEE and today runs the Addidici OBIEE consultancy which has operations in the UK, Europe, and South Africa.

Adrian runs one of the largest Oracle BI networking groups on LinkedIn – "Oracle Business Intelligence", and helps others to network and learn about the product and its application, including organizing networking social events in London.

In his spare time he loves sailing, skiing, enjoying life with his family, and learning new technologies.

Firstly, I would like to thank my wife Sarah for her enormous love and support over the years, and in particular whilst I was writing my part of this book. Thanks too, must go to my cool children, Hugh and Hatty, for their help in keeping the house quiet and delivering endless cups of tea, and also to my Mum and Dad for being the best parents you could ask for – always there when you need.

I will be eternally grateful to Narmada for her selfless support and to Chet Justice for his great sense of humor. Special thanks go to James Robinson for my first decent job, to my great clients for employing me, and the great people I have worked with over the last 20 years (including Steve Lomax, Robert Patterson, Trev Harvey, Eric Gravid, Adrian Ball, Haider Tirmizi, Luis, Piere, Andi Schloegl, Neil Ashton, Daniel and many more).

I am also indebted to Graeme Hampshire for inspiring me to get writing, and for helping to keep sailing fun, John Dunnet and the crew of The Beefeater for putting up with my captaincy, and Jon Spencer for being a great PRO.

Finally thanks to my special friends Daniel, Andy & Jenny, and Jamie & Jackie for putting up with me over the years!

About the Reviewers

Daan Bakboord is a full Oracle BI (Applications) Consultant with extensive experience in the deployment of Oracle BI Tools (Oracle BI EE, Oracle BI Publisher, Oracle BI Applications, and so on) in general and its application in an Oracle EBS environment in particular.

Daan is employed by Ebicus – an ICT service provider in the field of Oracle/Siebel CRM and Oracle BI (Applications). Within Ebicus, Daan is responsible for the development of knowledge and the dissemination of this knowledge to the market. One of the manifestations of this is the blog (*Oracle BI By Bakboord* – <http://obibb.wordpress.com>), which is maintained by Daan. In addition, Daan is active in several (online) forums, making him a part of the major Oracle BI community.

Besides his work, Daan is a proud father of a son and a daughter. He is also active in amateur football.

Kevin McGinley has worked in BI/Data Warehousing in both IT and consulting since 1997. He has helped both large and small companies define and execute BI/DW roadmaps and implementations, focusing exclusively on Oracle BI since 2005. Kevin is a recognized expert on Oracle BI through speaking at many conferences, publishing articles, giving master classes, leading user group conferences, the co-host of the YouTube podcast *Real-Time BI with Kevin & Stewart*, and is the co-author of *Oracle BI Enterprise Edition Dashboard & Report Best Practices*.

I'd like to thank the authors for the opportunity to review their fantastic book. There are so few books on Oracle BI out in the market and it's refreshing to see a nice, straightforward, end-to-end book on OBIEE 11g available for readers new to Oracle BI.

Ramke Ramakrishnan has performed the Lead Architect and Technical Leadership roles for over 15 years on Business Intelligence, by effectively managing the project team and the business customer expectations.

He delivers hands-on capabilities in the configuration of robust Oracle database and BI architectures, Oracle's Essbase infrastructure and large scale Business Intelligence Reporting, OBI Applications and EPM implementations. He is the key contributor for Business Analytics and Enterprise Reporting by integrating various applications systems into analytics to empower business customers, executives and end users.

He deployed several Enterprise Information Integration (Ei2) architectures, the core framework for Data Warehousing, Data Marts, OLAP, Business Analytics and Enterprise Reporting.

Ramke is Oracle Implementation Certified on Business Intelligence and EPM technologies. He is an active member and designated Deputy CTO (DCTO) on the Oracle Business Intelligence Investment Partner Community (IPC). He has featured in several Oracle speaking events and Oracle Press Releases on BI topics.

Currently, he is employed as Practice Director – BI and EPM with MarketSphere. MarketSphere is a strategic advisory and technology consulting firm with a strong focus on Oracle that helps our clients to deliver integrated ERP, BI and EPM solutions to optimize business performance. For more information, visit www.marketsphere.com.

I want to thank my wife Lavanya and my children Ritvik, Rasya, Rishik, and Raeya for their support and cooperation.

Table of Contents

Preface	1
Chapter 1: Understanding the Oracle BI 11g Architecture	9
Looking backward and looking forward	9
Let's look at the big picture	10
What is Oracle Fusion Middleware?	11
An application server by any other name	12
A database repository – for what?	12
Overall components	13
Java components	14
System components	15
WebLogic Server	17
A few software nuances	17
WebLogic Domain	18
WebLogic Administration Server	18
WebLogic Managed Server	19
WebLogic Node Manager	20
System tools controlled by WebLogic	21
Oracle Process Management and Notification system	22
Security	23
Backwards compatibility	24
Managing by application roles	25
Security providers	25
Identity Store	25
Credential Store	25
Policy Store	26
System requirements	27
Client Tools	27
Multiuser Development Environment	28
Certification matrix	30

Scaling out Oracle BI 11g	30
Preconfiguration run down	31
Shared storage	31
Clustering	31
Vertical expansion versus horizontal expansion	32
Oracle BI Server (system component) Cluster Controller	32
Failover and high availability	33
Enterprise deployment guide	33
Directory folder structure	34
Log files (diagnostics)	34
Configuration files	35
A review – what I should now know!	36
Additional research suggestions	36
Summary	37
Chapter 2: Installing the Metadata Repository	39
Repository Creation Utility (RCU)	39
What is the metadata store?	40
Technical metadata	40
Business metadata	40
Process metadata	41
Oracle Metadata Services (MDS)	41
Repository schemas	42
Non-repository metadata	43
Downloading the software	43
Running the RCU	44
Setting up your database	45
Oracle	45
MS SQL Server	46
Preparing for your installation	47
Linux	47
64 bit Linux	48
Standard installation steps	48
Adding repositories	60
Customizing your installation	61
Other common changes	63
Schema installations	65
Oracle CREATE USER Script	66
Silent installation	66
Example creation	68
Useful scripts	69
Usage tracking script	69
A review – what I should now know!	71
Summary	71

Chapter 3: Installing on Windows Server 2008	73
Installation media	73
System requirements	75
Installation	77
A review – what I should now know!	91
Summary	92
Chapter 4: Installation Options	93
Oracle BI on its own server	93
High availability and failover planning	94
Simple versus Software Only Installation	95
Software Only Install	95
Installing your own JDK	95
Simple Install	96
Silent installation	96
Custom static ports	97
Creating your own staticports.ini file	98
Installing Oracle BI 11g on *Nix	100
Listening on port 80	100
Ensuring IIS web server Role Services are installed	102
Getting the WebLogic Server Proxy IIS plugins	103
Creating and configuring an IIS Website	104
Enabling compression in IIS 7.x	107
Automate starting and stopping	108
Leveraging the WebLogic Server Windows Service installer command	109
Creating start-up and shutdown scripts	111
Creating desktop shortcuts	113
Creating boot.properties files	114
Ancillary application integration awareness	115
Recommendations for further learning	116
A review – what I should now know!	116
Summary	117
Chapter 5: Understanding the Systems Management Tools	119
Let's talk about management tools	119
WebLogic Server Administration Control	120
First access and checkpoint	121
Servers	122
Clusters	122
Machines, IP address, or DNS	123
Data sources or JDBC connections	124

Security realms	126
WebLogic Server is its own application	128
Using WLST	129
Enterprise Manager Fusion Middleware Control	131
Getting around in EM	132
BI Foundation Domain dashboard	132
Coreapplication	133
The Overview tab	134
The Availability tab	134
The Capacity Management tab	134
The Diagnostics tab	135
The Security tab	136
The Deployment tab	136
Managing Oracle BI 11g artifacts	137
Creating a new Presentation Catalog	138
Deploying an existing Presentation Catalog	140
Deploying an RPD	140
Starting/stopping system components	142
Checking the logs	143
Creating the Tennis users, roles, and associations	144
Creating users and groups in WLS	145
Assigning users to groups	146
Creating and assigning application roles	147
Configuring an LDAP identity provider in WLS	149
Setting up the identity provider	150
Establishing Fusion Middleware Control security linkage	153
Restarting the WebLogic Server and Managed Server	156
Assigning the LDAP Service Account Role Privileges	158
JMS modules for BI Publisher communication	160
Refreshing Presentation Catalog GUIDs – sync it up!	160
JMX, MBeans, and Java	163
Migrating FMW Security to other environments	163
FMW core security files	163
Project Amelia	164
Downloading Project Amelia	164
Getting the FMW Security file	165
Running the script and generating the WLST script	165
Migrating the security script and running it on the target server	166
FMW Security Import/Export utility	166
Using the Security Realm Migration utility	167
Using the migrateSecurityStore function via WLST	168
Oracle BI Publisher system management	169
Monitoring system performance	169

Have a backup plan!	170
Recommendations for further learning	170
A review – what I should now know!	171
Summary	171
Chapter 6: Upgrading the RPD and Web Catalog to 11g	173
Upgrading an RPD and Web Catalog	173
Upgrade Assistant	175
Verification	183
Upgrading BI Scheduler	184
Manual migration	188
Consistency check	188
Security	189
Regression testing	190
Unit test	190
Full regression testing	191
User Acceptance testing	191
A review – what I should now know!	192
Summary	193
Chapter 7: Reporting Databases	195
Theories and models	196
Reporting databases	197
Relational modeling	198
Dimensional modelling	198
Why is database theory important?	200
Designing your database – objectives, rules, and goals	201
Objectives	202
Rules	202
Rule 1 – complete dimensions	203
Rule 2 – build generic tables	204
Rule 3 – partition large tables	204
Rule 4 – prudent indexing	204
Rule 5 – aggregate everything	205
Rule 6 – constant analysis of usage and accuracy	205
Rule 7 – manage statistics	205
Rule 8 – understand the granularity	206
Goals	206
Goal 1 – keep it simple	207
Goal 2 – minimize type 2 slowly changing dimensions	207
Goal 3 – use data, not functions	207
Goal 4 – minimize joins	207
Goal 5 – reduce snowflaking	207
Goal 6 – make it flexible	208
Design summary	208

Creating a warehouse	208
Source system assessment	208
Warehouse design	211
Warehouse tables	211
Populate and tune	214
Monitor and maintain	214
Some definitions	215
A review – what I should now know!	216
Summary	216
Chapter 8: Developing a BI Repository	217
Prerequisites	218
Repository architecture	218
Physical layer	218
Business layer	218
Presentation layer	219
Physical layer	219
Creating an RPD and importing metadata	219
Elements of the physical layer	225
Database object	226
Connection pools	228
Physical catalog and schemas	230
Physical tables	230
Physical join	232
Consistency check	235
Table aliases and naming conventions	236
Business layer	238
Business model	238
Logical tables	239
Logical table sources	242
Logical columns	243
Logical joins	246
Dimension hierarchies	249
Presentation layer	255
Subject areas	256
Best practices in the presentation layer	258
Aliases	260
Implicit fact	260
Calculated measures	262
Logical column calculation	262
Expression Builder	264
Physical column calculation	266
Time series measures	268
Level based measure	271

Federated and fragmented content	273
Vertical federation – aggregation or level based	273
Horizontal federation	274
Fragmentation	274
Fragmentation example – content based	274
Variables and initialization blocks	279
A review – what I should now know!	286
Additional research suggestions	287
Summary	287
Chapter 9: Features of the Presentation Catalog	289
Integrated tools	290
Analysis	290
Dashboards	291
Published reporting	291
Actionable Intelligence	291
Performance management	292
Marketing	292
Mapping	293
Administration	293
Briefing books	293
Search	294
Help	294
Office integration	294
The Home screen	294
Common links	295
Existing object links	295
Create objects	296
Browse catalog	296
Helpful links	296
Administration	296
Groups and users	297
Privileges	298
Full privileges list	300
Session management	300
Maintenance and troubleshooting	303
Issue SQL	303
The Presentation Catalog	304
Structure of the Presentation Catalog	304
Hidden items	306
File management	306
XML files	306

Table of Contents

Object copying	306
Multiple personal dashboards	307
Catalog deployments	307
Securing catalog objects	307
Permission inheritance	309
Practical steps to object security	309
A review – what I should now know!	310
Summary	310
Chapter 10: Creating Dashboards and Analysis	311
Analysis versus Reporting	311
Creating an Analysis	312
Analysis Editor	314
Criteria Tab	314
The Results tab	316
Filters	317
Selection Steps	320
Saving an Analysis	324
Basic table formatting	325
Bins	328
Pivot Tables	332
Graphs	337
Sectioned views	338
View prompts and section sliders	340
Conditional Formatting	342
Building Dashboards	346
Creating a dashboard	346
Dashboard builder	347
Editing a dashboard	350
Adding a page	351
Report Links	354
Dashboard Prompt	356
Presentation variable	361
Protected and "is prompted" filters	363
Repository/Session variable	364
Some advanced options	366
Column Selector	366
View Selector	368
Master-detail linking	371
Hierarchical columns	374
Security	376
Object security	377
Data security	379

Design – best practices	385
Additional research suggestions	386
A review – what I should now know!	387
Summary	387
Chapter 11: Agents and the Action Framework	389
Agents	390
Actions	399
BI navigation	399
Web navigation and passing a parameter	402
Conditionality	404
Note on invoke actions	408
A review – what I should now know!	409
Additional research suggestions	410
Summary	410
Chapter 12: Developing Reports Using BI Publisher	411
Don't miss the installation integration checkpoint!	412
Where BI Publisher excels?	413
What's all this XML talk?	413
Yes, BI Publisher is now Published Reporting	414
Oracle BI Foundation versus Oracle BI Publisher	415
New features and enhancements	416
Improved Oracle BI 11g look and feel	416
Interactive Viewer	416
Dynamic upload and source from MS Excel spreadsheets	417
Leveraging LDAP user attributes in queries	417
Sharing a Presentation Catalog with Oracle BI 11g	417
Data Model Editor	417
Leverage view objects – Application Development Framework	418
Report design basics, terminology, and locations	418
Report design components	418
Data model	418
Layout	419
Properties	419
Translations	419
Where to administrate BI Publisher	419
Default embedded BI Publisher configurations	420
Where to build a data model	420
Where to add a data source connection	420
What is a JNDI data source?	421

Let's get publishing	422
Administration management of BI Publisher	422
Accessing the BI Publisher Administration page	422
Verifying application roles	423
Creating the Tennis data source JDBC connection	424
Creating a File (XLS) data source	425
Verifying application role data source privileges	426
Setting up a data model	426
Creating a new Presentation Catalog folder	427
Creating a new data model	428
Creating a SQL query data set	429
Adjusting data set display names	432
Creating a parameter	433
Creating a list of values	434
Connecting the parameter to the list of values	435
Getting the sample data	436
Creating a BI Publisher report using Layout Editor	438
Auditing and monitoring BI Publisher	441
Modifying a few configuration files	442
Connecting to the Audit Framework	443
Enabling Audit Policy in the Fusion Middleware Control Enterprise Manager	443
Viewing the auditing log file	444
BI Publisher nuances	445
Timeout issues	445
Connecting to Oracle BI server data sources	445
BI Publisher Application Programming Interface (API)	446
BI Publisher Scheduler	446
High availability	446
A review – what I should now know!	447
Additional research suggestions	447
Summary	448
Chapter 13: Customizing the Style of Dashboards	449
What's the idea?	449
Multiple skins and styles in one environment	450
A strategy for something seemingly simple	451
Involve the Marketing department	451
Don't boil the ocean	451
Speed to implementation	452
Build a focus group	452
General knowledge and tools	453

Third-party tools	454
Oracle JDeveloper skinning tool	454
BI Consulting Group Identity product	454
Hands-on – go time!	455
Overview	455
Let's talk about tools and assumptions	457
Locating existing styles and skins	457
Developing/designing a new look and feel	458
Getting analyticsRes deployed	459
Good artists copy, great artists steal	462
Modifying instanceconfig.xml	464
Modifying skins and styles	465
Changing the banner color	466
Changing the global header menu link's color	466
Changing the header separator bar	466
Changing the header brand name	467
Changing the Login page background	467
Restarting Presentation services	467
Restarting Presentation services from the command line	468
Restarting Presentation services from Enterprise Manager	469
Viewing the results	470
Configuring a custom message	470
Refreshing metadata files and custom messages	472
Wrap it up!	473
Advanced learning topics	473
Firebug	474
NetBeans IDE	474
Formatting CSS (prettify)	474
NQ_SESSION.SKIN and NQ_SESSION.STYLE session variables	474
AnalyticsRes Application Caveat	475
A review – what I should now know!	475
Summary	475
Chapter 14: Improving the Performance	477
What is poor performance?	477
Where can I improve the performance?	478
Hardware	479
Database	481
BI Server	482
More performance tips	484
The use of cache	484
Setting up the cache	485
Web servers on top	487
Domain setup	487

A review – what I should now know!	487
Summary	488
Chapter 15: Using the BI Admin Change Management Utilities	489
Problems with multiple developers	489
Merges	490
Three-way merge	490
Two-way merger	494
Multi-User development	494
Online development	495
Advantages and disadvantages	498
Multi-User development	498
Advantages and disadvantages	506
A review – what I should now know!	507
Additional research suggestions	507
Summary	507
Chapter 16: Usage Tracking	509
What is usage tracking?	509
System setup	510
Setting up the database table	510
Additional data	511
Setting up the BI Server repository	512
Updating the BI Server's configuration file	513
Analyzing the usage	516
Usage measures	516
A review – what I should now know!	519
Summary	519
Chapter 17: Oracle Essbase and OLAP Integration	521
A bit about OLAP	521
Competition	522
MOLAP, ROLAP, HOLAP, XOLAP	522
Essbase's entrenched past	523
Oracle Essbase Studio	524
Oracle BI SampleApp v107+ – VM image	524
Getting started – let's get set up	525
Prepping the VM image	525
Starting the virtual machine image	526
Starting up Essbase	526
Starting up Essbase Administration Services (EAS)	527
Prepping Essbase	528
Creating the base Essbase application and database	528
Migrating the Essbase files	531

Validating the Outline	531
Loading data into the cube	532
Anything needed to prep the Oracle BI Server?	533
Modeling Essbase into Oracle BI	534
A bit of Essbase to Oracle BI knowledge	534
Importing Essbase as a data source	535
A few OLAP adjustments before modeling	536
Flattening the Measure dimension	537
Getting the UDAs	538
Dimension and hierarchy types	538
Getting a quick win	540
Incremental importing of Essbase metadata	541
Federation of data	543
Oracle BI/EPM roadmap	543
Workspace integration	544
Software license combo	544
A review – what I should now know!	544
Additional research suggestions	544
Summary	545
Appendix A: Programs and Definitions	547
Stress testing	548
XML – a better approach	553
biserverxmlgen	553
biserverxmlexec	554
biserverxmlcli	555
Working example using XML	556
More repository management	558
Admin tool	559
A review – what I should now know!	561
Summary	562
Appendix B: Useful Resources: Join the Oracle BI Movement	563
This book's resources	563
OBI11gBook.com forums	563
Author blogs	564
Other Oracle BI practitioner blogs	564
Oracle development team blogs	564
Oracle BI user groups	565
Oracle Development Tools Users' Group (ODTUG)	565
Oracle Applications Users' Group (OAUG)	565
Independent Oracle User Groups (IOUG)	566
International Oracle Users' Group Community (IOUC)	566
