Section 1: Introduction
This document is a report on the results of a survey conducted in the city of London. The survey was carried out by the London Council and the results are presented in this report. The survey was conducted in the city of London and the results are presented in this report. The survey was conducted in the city of London and the results are presented in this report.

Section 2: Methodology
The survey was conducted using a questionnaire. The questionnaire was distributed to a random sample of residents in the city of London. The questionnaire was distributed to a random sample of residents in the city of London. The questionnaire was distributed to a random sample of residents in the city of London.

Section 3: Results
The results of the survey are presented in this section. The results of the survey are presented in this section. The results of the survey are presented in this section.

Section 4: Conclusion
The results of the survey indicate that there is a need for more public transport in the city of London. The results of the survey indicate that there is a need for more public transport in the city of London. The results of the survey indicate that there is a need for more public transport in the city of London.

Section 5: Recommendations
Based on the results of the survey, it is recommended that the London Council should consider increasing the number of public transport routes in the city of London. Based on the results of the survey, it is recommended that the London Council should consider increasing the number of public transport routes in the city of London. Based on the results of the survey, it is recommended that the London Council should consider increasing the number of public transport routes in the city of London.

To find the maximum likelihood estimates of the parameters, we need to find the values of θ that maximize the likelihood function. This is done by taking the derivative of the log-likelihood function with respect to each parameter and setting it equal to zero.

1. **Log-likelihood function:** $l(\theta) = \sum_{i=1}^n \ln f(x_i; \theta)$
2. **Derivative with respect to μ :** $\frac{\partial l(\theta)}{\partial \mu} = \sum_{i=1}^n \frac{1}{\sigma^2} (x_i - \mu)$
3. **Derivative with respect to σ^2 :** $\frac{\partial l(\theta)}{\partial \sigma^2} = -\frac{n}{2\sigma^2} + \frac{1}{2\sigma^4} \sum_{i=1}^n (x_i - \mu)^2$
4. **Setting derivatives to zero:** $\sum_{i=1}^n (x_i - \mu) = 0$ and $-\frac{n}{2\sigma^2} + \frac{1}{2\sigma^4} \sum_{i=1}^n (x_i - \mu)^2 = 0$
5. **Solving for μ :** $\mu = \frac{1}{n} \sum_{i=1}^n x_i$
6. **Solving for σ^2 :** $\sigma^2 = \frac{1}{n} \sum_{i=1}^n (x_i - \mu)^2$
7. **Maximum likelihood estimates:** $\hat{\mu} = \bar{x}$ and $\hat{\sigma}^2 = \frac{1}{n} \sum_{i=1}^n (x_i - \bar{x})^2$
8. **Example:** For a sample of $n=10$ observations: $x_1=1, x_2=2, x_3=3, x_4=4, x_5=5, x_6=6, x_7=7, x_8=8, x_9=9, x_{10}=10$, the MLEs are $\hat{\mu} = 5.5$ and $\hat{\sigma}^2 = 11$.
9. **Conclusion:** The MLEs of the parameters of a normal distribution are the sample mean and sample variance.

As you read this book, you will find a wealth of information about the lives of the men and women who shaped the world of World Wars. The book is written in a style that is both engaging and informative, and it is a must-read for anyone who is interested in the history of the world.

The book is divided into two main parts. The first part covers the lives of the men who were the leaders of the world during the wars, and the second part covers the lives of the women who were the heroes of the world during the wars. The book is a masterpiece of historical writing, and it is a must-read for anyone who is interested in the history of the world.

The book is a masterpiece of historical writing, and it is a must-read for anyone who is interested in the history of the world.

The book is a masterpiece of historical writing, and it is a must-read for anyone who is interested in the history of the world.

The book is a masterpiece of historical writing, and it is a must-read for anyone who is interested in the history of the world.

The book is a masterpiece of historical writing, and it is a must-read for anyone who is interested in the history of the world.

The $\mathbb{Z}/2\mathbb{Z}$ -module $\mathbb{Z}/2\mathbb{Z} \oplus \mathbb{Z}/2\mathbb{Z}$ is isomorphic to $\mathbb{Z}/2\mathbb{Z} \oplus \mathbb{Z}/2\mathbb{Z}$. The $\mathbb{Z}/2\mathbb{Z}$ -module $\mathbb{Z}/2\mathbb{Z} \oplus \mathbb{Z}/2\mathbb{Z}$ is isomorphic to $\mathbb{Z}/2\mathbb{Z} \oplus \mathbb{Z}/2\mathbb{Z}$.

The $\mathbb{Z}/2\mathbb{Z}$ -module $\mathbb{Z}/2\mathbb{Z} \oplus \mathbb{Z}/2\mathbb{Z}$ is isomorphic to $\mathbb{Z}/2\mathbb{Z} \oplus \mathbb{Z}/2\mathbb{Z}$. The $\mathbb{Z}/2\mathbb{Z}$ -module $\mathbb{Z}/2\mathbb{Z} \oplus \mathbb{Z}/2\mathbb{Z}$ is isomorphic to $\mathbb{Z}/2\mathbb{Z} \oplus \mathbb{Z}/2\mathbb{Z}$.

The book is intended for use in a first course in differential equations, or as a reference for students in other fields who need to solve differential equations. It is written for students who have completed a course in calculus and are familiar with the basic concepts of linear algebra and matrix operations.

The book is divided into two parts. The first part, Chapters 1 through 5, covers the theory and methods for solving ordinary differential equations. The second part, Chapters 6 through 8, covers the theory and methods for solving partial differential equations. The book is written in a clear and concise style, and includes many examples and exercises to help students understand the concepts and methods.

The book is written for students who are interested in the applications of differential equations. It includes many examples and exercises that illustrate the use of differential equations in physics, engineering, and other fields. The book is also suitable for students who are interested in the mathematical theory of differential equations.

1) These are the most common transliterations used for
English names in Chinese. They are based on the
Pinyin system, but use the letters 'W' and 'Y' instead of
'u' and 'ü'. For example, 'Wang' instead of 'Wang',
'Yan' instead of 'Yan', and 'Yue' instead of 'Yue'.
This system is used in most Chinese passports and
official documents.

2) These are the most common transliterations used for
English names in Chinese. They are based on the
Pinyin system, but use the letters 'W' and 'Y' instead of
'u' and 'ü'. For example, 'Wang' instead of 'Wang',
'Yan' instead of 'Yan', and 'Yue' instead of 'Yue'.
This system is used in most Chinese passports and
official documents.
