In the preparation of this book. I have been helped by many people, who have provided me with hisrorical material and answered my various queries, or who have guided me towards documentary and printed sources. For help on several points of hisocrical detail, I am grateful to Oliver Evenett, The Librarian, Royal Archives, and Pamela Clark, Deputy Registrar. Over many years, I have been particularly helped by Dr Christopher Dowling, Keeper of the Department of Museum Services, Impenal War Museum, Lindon, and, on all matters concerning Signals Intelligence, as well as many aspects of military, naval and air history, by Edward Thomas, whose willingness to guide my steps has been much appreciated.

On a wide range of historical matters I have also received considerable help from Winston G. Ramsey, founder and editor of After the Bottle magazine, and a pioneer in revisiting and exploring historical episodes both large and small in all the war zones.

Fur the answers to a wide range of questions concerning the United States, I am indebted to Larry Atom. President, the Claremont Justitute for the Study of Statesmanship and Political Philosophy, and to his colleagues Steven Lenzer and Daniel C. Palm.

In response to my enquicies for material and information, I must thank Rupert Allason. (Nigel West); Ralph Amelan, Jerusalem Post Archives, Jerusalem: F. For help in sorting the many thousands of folio sheets of material. I am grateful to Jussica Wyman. Tim Aspden has transformed my map drafts into maps of the highest quality. The typing of the manuscript of this book, as of my previous manuscripts for more than a decade, was done by Sue Rampton. All correspondence and extra typing was undertaken by Kay Thomson. The copyediting was under the expect eye of Peter James. While preparing the index, I was helped by Carmi Wartman, Oren Harman, Ephraim Maisel and my sun David.

In preparation for the second edition. I am particularly grateful to Adam O'Riurdan for his scritting of the text, as well as to all those who also sent me notes of errors. Furthis help, I should like to thank George Clare. D. S. Goodbrand, George Howard, Hugh Humphrey, A. C. H. Itvine, David Littman, Zvi Loker, D. M. Neale, Colonel Geoffrey Provell, Arthur Fareand Radley, Capitain A. B. Sainsbury, Alan L. Shaw, Outo Sigg, P. F. Smith, Sir Alexander Waddell, Andrew Wigmore and A. J. Williamson. For subsequent notes of errors, I am grateful to Ray Bailey, Ulihi Bergman, Warren Duke, Kevin McCabe, Richard Smock, L. A. Smith, Tormod Torp, Christopher Niebuhr, Richard Cardosi and Admiral of the Floet Lord Lewin.

At every stage since the book's inception I have been encouraged by my publisher. David Roberts, and by Ben Heltgott, a survivor of the Holocaust, who gave me the benefit of his considerable knowledge and wisdom.

As with each of my previous books, it is to my wife Susie that I owe both the nicticulous scrutiny of the text, and the determination to see fulfilled my aim of a single volume history of the Second World War which would cover the many different regions of conflict, and the soffering, beroism and achievement of soldiers and civilians alike.

# The German invasion of Poland

SEPTEMBER 1939

The Second World War was among the most destructive conflicts in human history; more than forty-six million soldiers and civilians perished, many in circumstances of prolonged and horrifying cruelty. During the 2,174 days of war between the German attack on Poland in September 1939 and the surrender of Japan in August 1945, by far the largest number of those killed, whether in battle or behind the lines, were unknown by name or face except to those few who know or loved them; yet in many cases, perhaps also numbering in the millions, even those who might in later years have remembered a victim were themselves wiped out. Not only forty-six million lives, but the vibrant life and livelihood which they had inherited, and might have left to their descendants, were blotted out: a heritage of work and joy, of struggle and creativity, of learning, hopes and happiness, which no one would ever inherit or pass on.

Inevitably, because they were the war's principal sufferers, it is the millions of victims who fill so many of these pages. Many of them can be, and are, named; it is they, and the unnamed men, women and children whose tragedy is the bitter legacy of the war. There is courage, too, in these pages; the courage of soldiers, sailors and airmen, the courage of partisans and resistance fighters, and the courage of those who, starving, naked and without strength or weapons, were sent to their deaths.

Who was the first victim of a war that was to claim more than forty-six million victims? He was an unknown prisoner in one of Adolf Hitler's exincentration camps, most probably a common criminal, in an attempt to make Germany seem the innotent victim of Polish aggression, he had been dressed in a Polish uniform, taken to the German frontier town of Gleiwitz, and shot on the evening of 31 August 1939 by the Gestapo in a bizatre faked 'Polish attack' on the local radio station. On the following morning, as German troops began their advance into Poland, Hitler gave, as one of his reasons for the invasion, 'the attack by regular Polish troops on the Gleiwitz transmitter'.

In honour of the ss Chief who had helped to devise the Gleiwitz deception, it had been given the code name Operation Himmler. On that same evening of August 51, the Soviet Union, Germany's ally of less than a week, had finally

been victorious in its battle with the Japanese on the Soviet-Mongolian borderlands, as Soviet forces, commanded by General Zhukov, destroyed the last resistance of the Sixth Japanese Army at Khalkhin Col. As one war ended, another began, known to history as the Second World War.

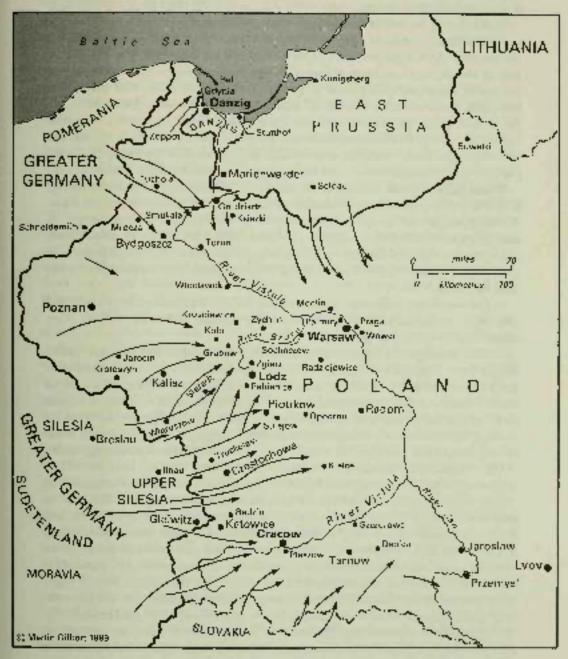

The German advance into Poland on a September 1939 was not a repeat of the factics of the First World War of 1914–18. Then, infantrymen, advancing towards each other until caught in a line of trenches, had mounted a series of attacks against a well dug-in enemy. Hitler's method was that of 'Blitzkrieg' – lightning war. Tirst, and without warning, air attacks destroyed much of the defender's air force while it was still on the ground. Second, hombers struck at the defender's mad and rail communications, assembly points and munitions dumps, and at civilian centres, causing confusion and panic. Third, divebombers sought our columns of marching men and hombed them without respite, while at the same time aircraft machine-gunned civilian refugees as they sought to flee from the approaching soldiers, causing chaos on the roads, and further impeding the forward movement of the defending forces.

Even as the Blitzkrieg came out of the sky, it also came on land; first in wave after wave of motorized infantry, light tanks and motor-drawn artillery, pushing as far ahead as possible. Then heavy tanks were to drive deep into the country-side, bypassing cities and fortified points. Then, after so much damage had been done and so much territory traversed, the infantry, the foot soldiers of everywar, but strongly supported by artillery, were to occupy the area already penetrated, to deal with whatever resistance remained, and to link up with the mechanized units of the initial strike.

Twenty-four hours after the German attack on Poland, an official Polish Government communique reported that 130 Poles, of whom twelve were soldiers, had been killed in air raids on Warsaw, Gdynia, and several other towns. Two German bombers were shot down, and the four occupants attested after a miraculous escape, the communiqué noted, when forty-one German aircraft in formation appeared over eastern Warsaw on Friday afternoon. People watched a thrilling serial battle over the heart of the city. Several houses caught fire, and the hospital for Jewish defective children was bombed and wrecked."

On the morning of September 2, German aircraft bombed the railway station at the town of Kolo. At the station stood a train of civilian refugees being evacuated from the border towns of Jarovin and Kronoszyn; 111 of them were killed.

Hitler's aim in invading Poland was not only to regain the territories lost in 1918. He also intended to impose German rule on Poland. To this end, he had ordered three is Death's Head regiments to follow behind the infantry advance, and to conduct what were called 'police and security' measures behind the German lines. Theodor Eicke, the commander of these three Death's Head regiments, explained what these measures were to his assembled officers at one of their bases. Sachsenhausen concentration camp, on that first day of war. In protecting Hitler's Reich, Eicke explained, the sa would have to 'incarcerate or annihilate' every enemy of Nazism, a task that would challenge even the

'absolute and inflexible severity' which the Death's Head regiments had learned in the concentration camps.

These words, so full of foreboiling, were soon translated into action; within a week of the German invasion of Poland, almost 24,000 officers and men of the Death's Head regiment were ready to emhark on their task. On the side of one of the railway carnages taking German soldiers castward, someone had written in white paint: 'We're off to Poland to thrush the Jews.' Not only Jews, but Poles, were to be the victims of this war behind the war. Two days after Licke had given his instructions to the Death's Head regiments, Heinrich Hunmler informed as General Udo von Woyrsch that he was to carry out the 'radical suppression of the incipient Polish insurrection in the newly occupied parts of Upper Silesia'. The word 'radical' was a euphemism for 'ruthless'.

Whole villages were burned to the ground. At Truskolasy, on September 5, lifty-live Polish peasants were rounded up and shot, a child of two among them. At Wieruszow, twenty Jews were ordered to assemble in the market place, among them Israel Lewi, a man of sixty-four. When his daughter, Liebe Lewi, ran up to her father, a German told her to open her mouth for 'impudence'. He then fired a bullet into it. Liebe I ewi fell down dead. The twenty Jews were then executed.

In the weeks that followed, such atrocities became commonplace, widespread and on an unprecedenced scale. While soldiers fought in battle, civilians were being massacred behind the lines.

On the aftermoon of September 3, German bombers attacked the undefended Polish rown of Sulejow, where a peacetime population of 6,500 Poles and Polish Jews were swelled by a further 3,000 refugees. Within moments, the centre of the town was ablaze. As thousands hurried for safety rowards the nearby woods. German planes, flying low, opened fire with their machine guns. 'As we were running to the woods', one young boy, Bon Heligott, recalled, 'people were falling, people were on fire. That night the sky was red from the burning town'.

On 3 September, Britain and France both declared war on Germany. 'The immediate aim of the German High Command', Hitler told his commanders, 'remains the rapid and victorious conclusion of operations against Poland.' At nine o'clock that evening, however, a German submarine, the U-30, commanded by Julius Lemp, respedded the British passenger liner Athenia, which is had mistaken for an armed ship. The Athenia, which was bound for Montreal from Liverpool, had sailed before Britain's declaration of war, with 1,103 passengers on board. Of the 112 passengers who lost their lives that night, twenty-eight were citizens of the United States. But the American President, Franklin Rossevelt, was emphatic when he broadcast to the American people on September 3: 'Let ato man or woman thoughtlessly or falsely talk of America sending its armies to European fields. At this moment there is being prepared a proclamation of American neutrality.'

Confident of a swift victory, on the evening of Suptember 3. Hitler left Berlin on board his special train, Amerika, in which he was to live for the next two weeks amid the scenes and congratulations of his first military triumph. The British Government, meanwhile, had put into operation its 'Western Air Plan
