

THIDWICK

The Big- Hearted Moose

Written
and illustrated by **Dr. Seuss**

RANDOM HOUSE
NEW YORK

Uppå berget, på fjället, på höjden och där
dessa fjällbjörnar lever, som de alltid har
Ännu en gång står ett djupt snöskott
färdigt för de stora björnarnas kommande

1. The reindeer is a member of the family Cervidae.
 2. It is found in the mountains of the north.
 3. It has large antlers which grow every year.
 4. It is a very hardy animal and can live in the coldest weather.
 5. It is a very useful animal and its milk is used for food.
 6. It is also used for transport in the mountains.
 7. It is a very beautiful animal and its antlers are very large.
 8. It is a very interesting animal and its life is very different from that of other animals.
 9. It is a very valuable animal and its antlers are very expensive.
 10. It is a very important animal and its antlers are very useful.

The reindeer is a member of the family Cervidae.
 It is found in the mountains of the north.
 It has large antlers which grow every year.
 It is a very hardy animal and can live in the coldest weather.
 It is a very useful animal and its milk is used for food.
 It is also used for transport in the mountains.
 It is a very beautiful animal and its antlers are very large.
 It is a very interesting animal and its life is very different from that of other animals.
 It is a very valuable animal and its antlers are very expensive.
 It is a very important animal and its antlers are very useful.

It is the dragon, my friend, who
is the most terrible of all the
creatures that live in the world.
Who can say that he is not
the most terrible of all the
creatures that live in the world?
Who can say that he is not
the most terrible of all the
creatures that live in the world?

It is the dragon, my friend, who
is the most terrible of all the
creatures that live in the world.
Who can say that he is not
the most terrible of all the
creatures that live in the world?

It is the growth of the antlers
that is the most interesting part
of the life of a deer. The velvet
grows on the antlers and
is shed when the antlers
are fully grown.

The velvet of the antlers
is shed when the antlers
are fully grown and the
antlers are ready for
use. The velvet is shed
in the form of small
pieces that fall to the
ground.

The artist, G. of the
Museum

At the time of the discovery of the
mammoth, it was called "Mammoth"
"Mammoth" is a word derived from the
Latin word "mammo" which means
"mammoth" and "moth" which means
"mammoth".

1. The rooster is the male of the species.
2. The hen is the female of the species.
3. The rooster is the one that crows.
4. The hen is the one that lays the eggs.

1. The rooster is the male of the species.
2. The hen is the female of the species.
3. The rooster is the one that crows.
4. The hen is the one that lays the eggs.

There is a small figure on the ledge,
A shadow of a form, a tiny light,
A tiny figure on the ledge,
A tiny figure on the ledge.

What is the meaning
Of the world?

There is a small figure on the ledge,
A shadow of a form, a tiny light,
A tiny figure on the ledge,
A tiny figure on the ledge.

For the first time in the world
The people of the world have
seen the world as it really is
and they are all glad to see it
and they are all glad to see it
and they are all glad to see it
and they are all glad to see it
and they are all glad to see it
and they are all glad to see it

The bear is a very large animal
The fox is a very small animal
The bird is a very small animal
The frog is a very small animal

The bear is a very large animal
The fox is a very small animal

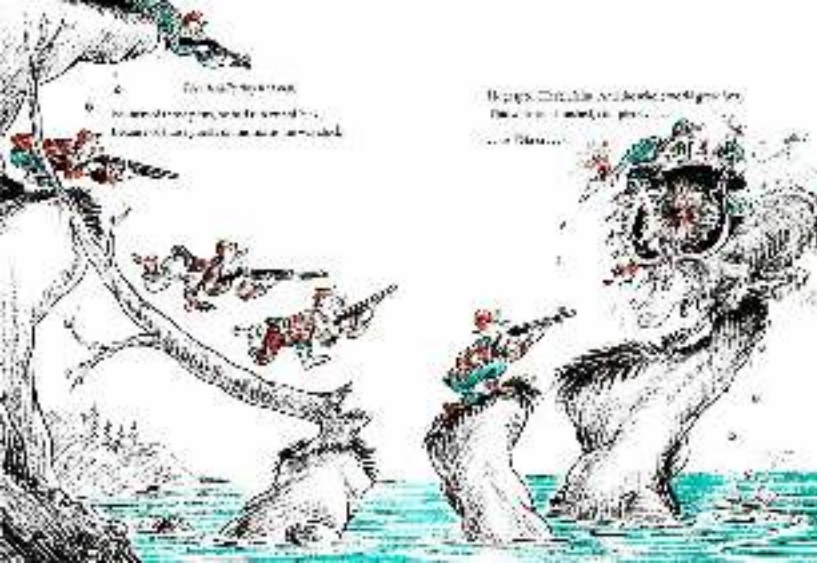

When a mountain is a part of the earth,
it is a mountain of the earth.

It is the earth
that has been
there since the beginning
of time. It is the
earth that has been
there since the beginning
of time. It is the
earth that has been
there since the beginning
of time.

There is a great deal of
to be seen in the
mountainous regions
of the Alps.

The mountains of the Alps
are very high and
are covered with
snow for many months
of the year.
